*la semplicità, portata all'estremo,
diventa eleganza*

*simplicity, carried to the extreme,
becomes elegance*

Jon Franklin

Valsir

think global, act local

La testa e il cuore di Valsir sono a Vestone, in Valle Sabbia, sulla direttrice che dal lago di Garda porta verso le Dolomiti di Brenta. Qui vengono definite le strategie di un'azienda proiettata sul mercato globale, che si realizzano anche attraverso accordi commerciali e joint-venture in Europa, Asia, Australia e Africa.

Un'offerta completa di sistemi per il mercato idrotermosanitario, un servizio attento e puntuale al cliente e un'attenzione particolare alla sostenibilità ambientale, economica e sociale nel lungo periodo sono gli elementi guida delle politiche Valsir. "Think global, act local" è la sintesi del nostro pensiero.

Valsir Vestone

The head and heart of Valsir are in Vestone, in Valle Sabbia, on the road that leads from Lake Garda to the Brenta Dolomites. It is here that the strategies of this globally oriented company are defined, which also involve the implementation of international trade agreements and joint ventures in Europe, Asia, Australia and Africa.

A full range of systems for the plumbing market, a careful and punctual customer service and the attention to environmental, social and economic sustainability are the elements driving the Valsir policies. "Think global, act local" is the synthesis of our thinking.

Cassette Valsir

Valsir flush cisterns

Innovazione tecnologica, attenzione ai dettagli e controllo costante della qualità uniti alla volontà di voler fornire a chi ci sceglie affidabilità e sicurezza.

All'interno dei laboratori di Ricerca e Sviluppo Valsir è stato messo a punto un particolare compound plastico, ricetta unica di Valsir, con l'obiettivo di rendere silenzioso il contenitore delle cassette di risciacquo.

Grande attenzione è stata riservata al risparmio di un bene prezioso come l'acqua: Valsir propone una gamma di cassette in grado di scaricare con solo 4,5 l; è inoltre possibile, con i modelli a doppio pulsante di scarico, scegliere la quantità a seconda delle necessità, evitando così inutili sprechi.

Technological innovation, attention to details and constant quality control, together with the desire to provide our clients with reliability and safety.

Inside the Valsir Research and Development laboratories a special plastic compound was designed using a formula (exclusive to Valsir) with the aim of reducing the noise emissions from the flush cistern.

Much attention has been dedicated to water saving: Valsir produces a range of cisterns that generate a flush volume of only 4.5 l. With the dual flush button is also possible to choose the volume according to necessity.

Tropea S

La rivoluzione silenziosa in soli 84 mm di spessore. Risparmio idrico garantito con regolazioni 6/3, 4,5/3 e 4/2 litri a tutela dell'ambiente.

A silent revolution in a depth of just 84 mm. Water savings guaranteed with settings at 6/3, 4.5/3 and 4/2 litres to protect the environment.

Aspirazione degli odori

Extraction of odours

Il funzionamento di Ariapur è semplice ed estremamente performante. Ariapur infatti cattura gli odori direttamente dal vaso WC, aspirandoli ed eliminandoli prima che si diffondano.

Ariapur provides a simple and high performing operation. In fact, Ariapur captures odours directly in the WC pan, extracts, and eliminates them before they spread.

Aspirazione del vapore

Extraction of vapour

Allo stesso tempo elimina il vapore generato durante l'utilizzo di docce e vasche attraverso il sistema di ventilazione della placca aspirante.

At the same time, it eliminates the vapour generated during use of the shower and bathtub through the ventilation system of the extractor plate.

MFV

Il nuovo modo
di costruire

*A new construction
technique*

valsir

valsir

MFV

Il sistema MFV è stato ingegnerizzato per essere montato in pareti attrezzate, addizionali alla struttura del fabbricato, che consentono l'allestimento di un bagno in modo veloce, semplice e pulito.

MFV si installa senza l'uso di attrezzature particolari e, con l'utilizzo di soli 4 componenti rende possibile la realizzazione di soluzioni personalizzate per l'installazione di vasi WC, bidet, lavabi e Ariapur: il sistema di estrazione dell'aria direttamente dal vaso del WC.

The MFV system was engineered to be mounted in wall units in addition to the building structure, allowing bathroom installation to be performed in a quick, simple and clean manner.

Special tools are not required for installation of the MFV system; with just 4 components customized solutions can be created for the installation of WC pans, bidets, washbasins and Ariapur: the extractor fan that removes air directly from the WC pan.
